

Pergo Outlast+ Installation Summary

Pergo Outlast+ is exclusive, water-resistant laminate flooring launching in stores the week of May 2

**We
install it!**

Important Points

- Pergo Outlast+ installs just like other Pergo products, with one additional step:
 - Sealing the perimeter is necessary to prevent liquid (from spills or cleaning) from contacting the exposed edges of the floor
 - All transition moldings and decorative moldings, as well as door frames and other fixed objects must be sealed
- HDMS quotes these skus for installs
- Silicone caulk and foam backer rod and sealing labor (additional \$0.50/linear foot) will be added to quotes

Resists water. Ends worries.
Protects against the spills you might miss for up to 24 hours.

Pergo Outlast+
with SpillProtect24

Ordinary laminate

Unlike ordinary laminate, Pergo Outlast+ combines Uniclic® joint technology with revolutionary SpillProtect24™ to prevent liquid from seeping into the joints for up to 24 hours, even allowing wet mopping.
