

Thank you for choosing The Home Depot

We are committed to helping you with your new kitchen!

Hello, My Name is Vincent Mannion, the Vice President of ACS Home Renovations.

Whether you are remodeling your current home or building a new one, from choosing the cabinets to installing the appliances, The Home Depot and ACS are here to help throughout the process. Enjoy the anticipation of your new kitchen or other cabinet project without the worries of coordinating all of the work yourself!

Here at The Home Depot in New Jersey, our project design and installation team is ready to help you make your dream kitchen, bath, study or other project a reality. ACS has been a valued Service Provider of The Home Depot for 23 years and our team has the knowledge, skill and installation expertise to create a beautiful and functional space tailored to you and your families needs and life style.

After the project you have in mind is fashioned into an efficient and attractive design using an advanced computer design system, you will be able to visualize your room even before materials are ordered.

Then the transformation magic truly begins. As The Home Depot's licensed and insured installers we turn your formerly empty or outdated room into the fabulous one you imagined. We can provide and install all the components needed to create your new room... flooring, cabinets, countertops, electrical, lighting, plumbing, appliances, crown molding, even tile backsplashes to finish the look you are dreaming of.

To get you started attached is our Kitchen Planning Guide for you to read through, then there are four ways to schedule an appointment - speak with an Associate at your local Home Depot, call The Home Depot at 1-877-355-9817, Text "KIT APPT" to 770-910-5308, or visit www.homedepot.com/getstarted.

We appreciate your business and look forward to working with you.

REPLACE. REFACE. RENEW.
