Great job!

Who will be in the Top 10 SQ YD report next month?

Thank you for all the hard work.

Magic Plan now Available!

Magic Plan is an iOS app that lets you create floor plans in a fast and fun way. Use the camera of your device and while turning around, mark the corners of your space. When you are finished, Magic Plan aggregates a floor plan! With just a little practice you'll be capturing a room using Magic Plan within a minute.

Customers now have the ability to bring in their measure information by using Magic Plan.

The following formats are available to create your plan

- JPG
- PDF
- WEB
- DXF

Here are some of the benefits of using this mobile application

- Customer can bring in better measurements for a more accurate pre-quote in order to set up their budgets
- Sketching is faster and more accurate a measure for a room and can be done in less than a minute
- Room dimensions, labeling, and room layouts can be notated
- If things are a little "off" the app understands and adjusts doorways to fit, etc. And you can go into any room after the fact and quickly adjust the sizes if something isn't right, plus add windows, closets, stairs, etc

Download this free application by searching for Magic Plan on your smart phone.

Features/ Benefits of Vacuums

Carpet manufacturers recommend regular vacuuming of new carpeting in order to refresh and renew the carpet fibers. There are numerous styles of vacuums available. The following features and benefits are available with the most common.

Canister Vacuums

Canister vacuums often provide better suction than upright models and generally last longer. The long metal hoses found on canister vacuums work well for cleaning upholstery, stairs and draperies and even reach under sofas and beds. Some canister models offer a hard surface setting that turns the beater bar off, which is an important feature if you want to clean hardwood or tile floors because the beater bar may dent or damage these surfaces. One drawback to canister vacuums is that they may seem more cumbersome to use than uprights. The vacuum bags are small, requiring frequent replacement.

Upright Vacuums

Upright vacuums range from lightweight models priced under \$100 to heavy-duty machines that cost well over \$1,000. Upright vacuums are easy to use and clean carpets well. They may have a hose with attachments for cleaning stairs and upholstery. Some models have a bagless, cyclone vacuum system that eliminates the need for vacuum bags, although the collection cup must be emptied. Uprights vary in their cleaning ability and may lose suction over time. Additionally, they may not have a setting for hard surfaces. The attachment hoses are often flimsy and short.

Wet/Dry Vacuums

Wet/dry vacuums, sometimes known as shop vacs, handle bulky materials or wet spills that would ruin an ordinary vacuum. These machines have a large canister with no bag. The nozzle attachment simply vacuums up anything in its path, including sawdust, drywall scraps and litter from your car. Since these vacuums don't have a bag or seal, they tend to be dusty, and their size makes them impractical for indoor use. Keep one in the garage or shop for cleaning up big spills.

Steam Vacuums and Carpet Extractors

Tired of hiring someone to clean your carpet every six months? These machines offer a cost effective way of doing it yourself. They range in price from \$120 up to \$300 or more. Some models offer a rinsing feature to help rinse some of the shampoo from the carpet. Other models can do some types of smooth flooring as well. The best advice I can give you about [steam vacuums](#) is to be wary of how much water and solution you are putting into the carpet. If you over-saturate your carpet, drying time will increase. Be sure to run clean hot water through the machine when you are finished. This will keep the solution lines inside the machine from being clogged with soap residue.
