

More saving.
More doing.

LET'S GET READY

PREPARING FOR NEW FLOORING

Please follow these guidelines to be prepared for a successful installation. Ensure that all furniture surfaces, bookcases and entertainment centers are cleared. Carefully pack away and move all small items such as china, figurines, table-top pictures and any precious or breakable items. It's best to remove pictures from the walls of spaces that are traffic-ways for the furniture moving and installation. Closet floors should be cleared and all low hanging items removed. All electrical items should be unplugged. All items that the Home Depot is unable to move should be moved prior to your installation date. By making sure that your space is properly prepared, you will help to ensure that your installation goes smoothly and there are no delays. Please contact us with any questions!

NOT READY LIVING ROOM

Carefully pack away, unplug and move electronics and small breakable items

READY LIVING ROOM

NOT READY BEDROOM
