

What are we doing?

Updating the installation instructions for all NUVELLELOCK SOLID CLICK HARDWOOD FLOORING.

What products are this change applied to?

Mfr. Model #	OMSID	S/O SKU	Stock SKU	INTERNET SKU
NV1SL	206634113	1001829261	1001645489	1001618863
NV2SL	206632825	1001829270	1001645492	1001618870
NV3SL	206634150	1001829273	1001645818	1001619544
NV4SL	206634220	1001829274	1001645826	1001619546
NV5SL	206634222	1002114160	N/A	1001619550

What has changed?

The previous installation instructions were for the **FLOATING installation** method only.

The new installation instructions now include **STAPLE and Glue down instruction**

All products listed are now warrantied to be Floated, Nailed, Stapled or Glued down.

Why are we updating?

Increase sale opportunities:

Survey feedback from a large consensus of PRO installers and Home Depot installation companies indicate that they still prefer the staple method and in some cases the glue down method over the Floating method. Job site conditions can limit the ability to use the floating method.

Survey feedback from the DIY consumers indicate the floating method is the preferred.

What type of adhesive, staples or nails are recommended?

ADHESIVE: Premium wood flooring adhesive formulated for installation of solid hardwood.

Example: Roberts R1509 Superior, Taylor MS plus

Staples: 4d (1.5") to 6d (2")

Example: Home Depot offers a very wide variety of these products
